

All New Classic Series from Classic Instruments

Nostalgic style with modern functionality.

Boyne City, MI, May 16th, 2016—Classic Instruments has just released their all new Classic Series. This series fuels nostalgia for the traditional days of hot rodding while integrating the reliability and convenience features of today. The rugged air-core movement and all electronic components provide an instrument with a high level of versatility, quality, and accuracy. Classic Instruments is pleased to introduce with this series, an all new size offering, 2 5/8". All Classic Series instruments are available as individual instruments or as part of a five or six gauge set. The series features polished stainless steel radial bezels, curved glass lenses, nostalgic crescent moon pointers, and rich black dial faces.

Instruments and sets available include:
